Handcrafted FURNITURE

A wooden Adirondack chair is positioned on a dark wooden deck. The chair is made of light-colored wood with a dark frame. It is angled towards the right, looking out over a scenic landscape. In the background, there is a calm lake with a small white boat in the distance. Beyond the lake, there are rolling green hills and mountains under a clear blue sky. The lighting suggests a bright, sunny day.

About the Craftsman

I learned first hand from my early years, mentored by both my grandfather and my uncle in the craft of cabinetry. Over the years I've continued to perfect those skills and with an added interest in period pieces, have studied and practiced traditional carving necessary to enhance certain styles. Creating one of a kind pieces of furniture is both a challenge and privilege.

I am always looking forward to working with my clients to create that special piece whatever it might be.
